

Affordable Housing for Working People

PETITION TO PRINCETON TOWNSHIP

People we depend on to work for us, from day care center teachers to home health care workers to emergency medical technicians, can't afford to live in Princeton Township. They need affordable housing and we need them in our town. They need to be able to live close to where they work, because they can't afford the cost of long commutes and the cost of housing.

We the undersigned residents of Princeton Township, working with the Mercer Alliance to End Homelessness, urge Princeton Township to do everything it can to maximize housing for very low income families.
